

The Great Harbour N47

In 1995 Great Harbour Trawlers set out to reinvent the full displacement, live-aboard trawler from the keel up, re-thinking every aspect of what makes sense for the active cruising lifestyle. After more than a decade of constant innovation, Great Harbour Trawlers proudly introduces our newest model, the Great Harbour N47. Drawing from the legendary N37, the N47 adds much more than length, with interior space for three staterooms and two heads, the N47 is both versatile and comfortable.

At the heart of all Great Harbour Trawlers is a dedication to inherently stable hulls that do not require either complex fin stabilization or cumbersome paravanes. Fully protected shafts and propellers turned by twin diesels provide for absolute redundancy, great maneuverability and outstanding fuel economy. All of this combined into an unsinkable vessel makes the Great Harbour Trawlers stand out in a marketplace crowded with antiquated, round bilged, ballasted, Chinese-built boats.

The N47 is designed for the active cruising lifestyle that most only dream about. With a potential fuel capacity of over 1300 gallons the N47's range is truly transatlantic. More importantly, the N47 has the capabilities to be self sufficient for months at a time. Available watermaker, 13 KW generator and huge integral, lifetime tanks for water, fuel and waste enhance this independence.

Other features of this roomy trawler are the unmatched storage and workspaces. An exceptional seven feet of headroom in the engine room makes maintenance a pleasure rather than a chore. With a shoal

draft of only three feet, the N47 opens up cruising areas unreachable by our competitors. The ability to carry an oversized dinghy adds to the limitless capacity for gunkholing. Stairs in the saloon floor lead you down to a cavernous fifteen-foot by five-foot bosun's locker with space for all the toys and provisions for those months long cruises.

Mirage Manufacturing, builder of the Great Harbour Trawlers, has a thirty-six year history of building top-quality boats. Recognized as the largest U.S. manufacturer of full displacement pleasure trawlers, Great Harbour has yet again raised the bar with the new N47.

If you have ever dreamed of a vessel that was easy to handle with straightforward systems and real redundancy to always get you home and keep you comfortable, the N47 represents that reality. You owe it to yourself to learn more about the N47. Call us to arrange a tour of our factory or to discuss how we can facilitate your personal cruising dreams.
