

We're Raising the Bar Again!

Introducing the
Great Harbour
N47

Great Harbour Trawlers, the largest US manufacturer of full-displacement pleasure trawlers, proudly introduce our newest model, the Great Harbour N47. Drawing from the design of our legendary N37, the N47 boasts interior space for two heads, three staterooms, a stand-up engine room, a cavernous bosun's locker and a full kitchen - and that's just the beginning.

The **Great Harbour N47** exemplifies the principles at the heart of all Great Harbour Trawlers with form-stable hull, fully protected shafts and propellers and twin diesel engines providing absolute redundancy. A shoal draft of only three feet makes the N47 great for gunkholing. With its huge integral lifetime tanks for water, fuel and waste and available 13 KW generator and watermaker, the N47 can be self-sufficient for months at a time. A range of up to 3900 miles gives the N47 true transatlantic capacity.

So if you have ever dreamed of a vessel that was easy to handle with straightforward systems and real redundancy to always get you home and keep you comfortable, you owe it to yourself to learn more about the N47. Call us to arrange a tour of our factory or to discuss how we can facilitate your personal cruising dreams.
